Hi Mani & Sunil,

I respect your perspective; I recognize that my involvement may not have met your expectations.

After reflecting on the situation and considering that I’m currently serving my notice period, I’d like to propose an early release by opting for a buyout of the remaining days. I believe this would create space for someone more aligned with the team’s current goals and deliverables. If you think I’m not contributing or not met your expectations in work, kindly let me step aside professionally. I hope this makes sense and this approach will contribute positively to the team.

Please let me know the next steps or any formalities required to proceed with this arrangement.

Thanks for the understanding.

BR,
Vijayapradap MURUGAVEL.

Subject: RE: Productivity issues - unplanned leaves

Hello Vijay,

1. Cambrionix setup, I've been followed the installation document and initiate the tests. In setup, we haven't faced any issues so far. Issues with automation, code, and network side.

Combrionix setup and software installation will take hardly 2hours Vijay, only for python module installation is having network issue. What is blocking here?

2. As per given instruction, I've initiated the test run with master branch. So, we were facing build and other errors because it's in development stage. I've been reported and tried to resolve some of them.
3. But actual case is, I need to run this all with release tag of v2.7.0 which is already verified and released.

Many times, I told you to work on previous package release version to run the test cases and even master also should work, so this is not something which is unusual which is causing you some delay in execution!

4. In-between we were facing network issues while changing LAN network. Due to that we were facing double login issue and other clone issues.
5. As you know, I was facing permission denied issue and it got resolved a couple of weeks ago.

Permission denied issue does matter at all, many times I told you to take a repo from my PC, but you never copied from my laptop, if you would have copied the source code from PC, you could have not seen the permission denied issue and Thierry has given project access a month ago(27-June-2025), please cross verify the mails once.

6. Now, I’ve been initiating test run on my PC. So, we could see better results compared to previous ones. Still some issues persist. I will figure out those issues asap.

We are not expecting 8 years of guy can run only the test cases, we are expecting to resolve the issues quickly, from starting of the project you are just running the test cases and providing result, but the expectation from you is to fix the setup/testcase issues quickly and move forward.

At maximum, executing the test cases will take one week(nightly) for all 17 boards, parallel you have to analyze the tickets as well, multiple times I have told you to analyze the tickets but no improvement of ticket. Unless we complete all the tickets (merged), we can’t say the work is done!

Every time I can’t give false commitments to the customer and still, we have not concluded the test results status yet. Still too may failures. This is lagging big time.

7. I've started analyzing P1 tickets and have noted my observations.

[@Vijayapradap MURUGAVEL](#) if you are working on tickets, please provide the issue details till now you have solved. Same will be updated in the Bugzilla tickets so that other can view your analysis. have you analyzed and commented any assigned Bugzilla tickets so far? If yes, please provide me the analysis.

8. If we have a checklist for a new setup configuration, that would be more helpful to find issues.

We don’t need any specific check list for new setup. Only installation of software and we have provided the documentation for X-Cube-SBSFU and Proper KT as well. you could have asked these questions in your KT sessions. This is surprising!

-
[@Murugavel, Vijayapradap](#) My point of view:

1. Need to have individual responsibility to complete the task, I can’t come and ask every time. Following up every time for fresher is ok, but not for your work experience.
2. You need to spend more time to resolve the setup issues and Bugzilla tickets. You need to spend more time in office (at least 9 hours).
3. I own another modules for the delivery (WL55,U5,L5,X-cube-SBSFU) so my involvement in X-Cube-SBSFU will be minimal.
4. You should be more proactive to complete the work on time otherwise we will miss the X-cube-SBSFU deliveries (Might get into SP8 penalty mode)
5. Hardly it takes one week to execute the tests but still no conclusion you need to be more proactive in concluding the tasks.
6. We have to provide the test bench status to customer otherwise can’t solve the tickets, but we have only three weeks of time to complete the customer tickets, need your attention to close the tickets.

Best Regards,
Manikanta PILLI

Hello Manikanta,

From the below justifications from Vijay, there seems lot of issues in network, code, automation? Has he reported all these issues to you?

My understanding is, Vijay should be working on his PC, not your setup. His all-project permission is done on **27th June (almost a month ago)**. How many tickets Vijay has analyzed and provided analysis/solution so far while his PC is busy running tests?

[@Murugavel, Vijayapradap](#), weekend work request was made to complete pending tasks, not to overrun you!

Best Regards,

Sunil Kumar

Hello Sunil,

I agree with you and don't want to expand this plot. But I'd like to make some points here,

1. Cambionix setup, I've been followed the installation document and initiate the tests. In setup, we haven't faced any issues so far. Issues with automation, code, and network side.
2. As per given instruction, I've initiated the test run with master branch. So, we were facing build and other errors because it's in development stage. I've been reported and tried to resolve some of them.
3. But actual case is, I need to run this all with release tag of v2.7.0 which is already verified and released.
4. In-between we were facing network issues while changing LAN network. Due to that we were facing double login issue and other clone issues.
5. As you know, I was facing permission denied issue and it got resolved a couple of weeks ago.
6. Now, I've been initiating test run on my PC. So, we could see better results compared to previous ones. Still some issues persist. I will figure out those issues asap.
7. I've started analyzing P1 tickets and have noted my observations.
8. If we have a checklist for a new setup configuration, that would be more helpful to find issues.

As you know, I came two weekends to complete / run tests. Hereafter, as per your request I won't take leave and won't work on weekends.

Thanks & Regards,
Vijayapradap MURUGAVEL.

Subject: RE: Productivity issues - unplanned leaves

Hello Vijay,

Employees are allowed to take leaves during notice period provided there is no impact on the project deliverables. As of today, you have not completed the below activities.

1. Stabilizing the Cambionix setup for X-Cube-SBSFU
 1. It has been almost 2 months and the setup is still not ready
 2. Executing the tests are not enough, for your experience you need to fix the issues quickly and make the setup ready.
2. There are many tickets in your name to be resolved before 15th August 2025. This is at high risk at the moment.
 1. While executing the test setup, you are expected to work on high priority ticket (analysis, writing your observation in the ticket etc).

Each and every weekly call we can not keep on saying that we are having trouble in the test setup. We need the resolution very very quickly.

So, we request you not to take leaves, unplanned absents during this service period so that the X-Cube-SBSFU delivery is not hampered. I hope it is clear.

Best Regards,

Sunil Kumar

Hi Sunil,

It's a planned leave and I have been applied and got approved for the same. And, while on a day off you may get late response sometimes. As we know, while serving notice I can take a couple of days' leave for a month as per exit policy. I applied for a day-off over portal while filling timesheet.

Leave approval status FYR :

[IND] - Privilege Leave request for July 21, 2025 - July 21, 2025 has been approved by Sunil Kumar for Vijayapradap Murugavel

BR,
Vijayapradap Murugavel.

Hello Vijay,

Are you working today? We are trying to reach you over the phone; you need to answer the call and talk.

Please note that your unplanned leaves or unproductive days might extend the notice period.

Thanks and regards,
Sunil KUMAR

Importance: High

Hello Vijay,

We have noticed a pattern of frequent leaves in recent days, each citing different reasons. Unfortunately, this has begun to impact the progress and timely delivery of our SP7 milestones.

We kindly urge you to maintain regular attendance at the ODC and perform consistent commitment to your assigned tasks. Your presence and active involvement are crucial to ensuring the success of our ongoing work.

Please feel free to reach out if you have any concerns or need support in managing your responsibilities.

Thanks and regards,
Sunil KUMAR
